

MORNINGTON GREEN

Legacy Gardens

Mornington Green is a botanical garden that reimagines how we celebrate life.

Join us in transforming this former golf course into a beautifully landscaped Legacy Garden, where memories grow.

PLANTING A LEGACY

One day we won't be able to be there for the ones we love. When that day comes your family and friends can find comfort under the tree you planted together, to feel connected to you, when they need you the most.

In these gardens, your ashes will be carefully treated and infused into a tree of your choice to live on for generations to come.

3 Steps to create your Living Legacy

Choose your
tree and location.

Book a **tree
planting ceremony.**

Visit your tree
and **watch it grow.**

Size: L
Infusions: 4

CREATE THE IDEAL EXPERIENCE

You get to choose the experience that is right for you and your family. Whether you prefer a small gathering or a larger group, our team will lovingly tailor the Tree Planting Ceremony to your needs.

Your family will become a part of this unique experience that will honour both the life you lived and the thriving ecosystem you contributed to.

For Jonathan, the thought of his children being welcomed by hundreds of flowering trees while visiting his cherry blossom tree on his birthday gave him enormous comfort.

“I just love thinking of my kids laughing & sharing stories under the flowery roof of hundreds of cherry blossom trees,”

JONATHAN T.
2020

Revisiting the Gardens

You, your friends and family are welcome to visit the gardens at any time of the year. Our wish is to become a place where new traditions and memories are made.

Whether you would like to arrange a high-tea or lunch at Magnolia House, grab a hamper and head for a picnic by your tree, or simply walk around the garden – our doors are open.

YOUR IMPACT

For every Legacy Tree planted at Mornington Green, an additional 400 trees will be planted globally and locally in your name.

Your forest footprint will double the amount of air you breathed in your lifetime, ensuring that you leave a positive impact on mother earth.

SOIL SCIENCE

Scattering ashes is an idea that many of us find appealing. But did you know that human ash has the same pH as bleach and very high levels of salt.

When scattered, untreated ashes impair the plant's ability to grow and cause irreparable damage.

Using the patented Living Legacy Ash Treatment, we are able to detoxify the ash and restore the essential soil biology.

By transforming the ash, we assist the soil and the tree in exchanging energy and creating new life.

THE BEST TIME TO PLANT IS NOW

Becoming a tree at Mornington Green helps to save the planet and save thousands compared to the cost of a traditional funeral.

Pre-planning relieves the burden

- Planning in advance reduces emotional and financial stress down the track.
- Pre-planting allows you to enjoy creating your Legacy Tree with your family by your side.

Choose the legacy you want to leave

- Ensure that your life contributes to the growth of mother earth.
- Give your loved ones a beautiful place to visit and enjoy.

Book a tour of the Gardens

You are invited to tour Mornington Green with your family. Take a peaceful stroll and let your feet sink into the lush green grass. You can discover your perfect tree, and choose the perfect place for your Legacy Tree to grow.
